### EGGER EURODEKOR® Uni decor

Light Gray    Stone Gray    Cashmere    Sand Beige    Dusty Gray

### White decor

White

### Edge material

Aluline (1 mm)

### Profile surface (for sliding door, sliding door Air and folding door)

Anodized Silver    White    Black

The frame is formed by elegant profiles made of high-quality, silver-colored aluminum, white or black. The fillings can be designed according to your wishes and preferences. You have the choice of glass lacquered on the back, wood-based panels with lacquered or decorative surfaces or reproductions of your own originals.

All surface qualities are insensitive to moisture, mechanical influences and easy to clean if required. Fillings with reproductions of your own photo motifs in digital printing are a real design highlight.

### Comments:

The manufacturer reserves the right to make changes without notice.

- (1) Backing in matching color combination.
- (2) The safety film is an adhesive film which is attached to the back of the glass or mirror panel to prevent splintering in the event the panel is broken. For visual reasons the safety film is not used for transparent panels.
- (3) Incl. white hardboard, deduction if hardboard is omitted 85 EUR.
- (4) Clouding, dust inclusions or paint drips may occur during the production of lacquered and satinized surfaces. The panel is not suitable for back-lighting.
- (5) The delivery time is extended by two weeks.
- (6) White glass
- (7) Without white hardboard
- (8) Natural product: color differences in the veneer do not represent a complaint reason.
- (9) Satin mat lacquered
- (10) Dull mat lacquered
- (11) 8mm with mirror gasket
